

# AI Startup Legal Document Generator

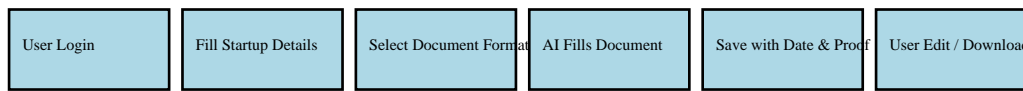

## 1. Project Goal

To build a tool that can prepare startup-related legal documents automatically by asking a few basic questions from the user.

## 2. How it Works

1. User opens the application and logs in.
2. A simple form appears, asking about the startup name, place, founders, and type of work.
3. The system chooses the right legal document format.
4. AI fills the details inside the document.
5. The document is saved with date and proof for ownership.
6. User can check, edit, and download it.

## 3. Workflow

## 4. Features

- Easy question-answer based document creation.
- Multiple types of legal documents available.
- Saves with date and ownership proof.
- Edit and download options available.

## 5. Future Scope

- Option to sign documents online.
- Support for more states and countries.
- Mobile app version.
- Voice-based document creation.
